Ascent HealthCare is a fee for service recovery support business aligned to Challenge Trust.

Through a Memorandum of Agreement Ascent and Challenge Trust support and assist each other in the specialised area of Mental Health recovery support. As specialist providers of quality services and with shared goals, values and core competencies, Ascent and Challenge Trust are able to provide a comprehensive and cohesive service to both the public and private sectors.

We recognise that for every person currently receiving support in their home through the state funded Mental Health system, there could be three people in the community not receiving assistance.

Mental Health Support For Individuals, Their Families, And Clinicians

Through our dedicated Community Support Worker (CSW) staff, we have developed a service package of care that can be tailored to each individual's specific needs. Ours is an holistic approach that supports emotional and spiritual well-being and respects the importance of culture, equity, social justice and personal dignity.

The level and type of support required will vary according to each individuals needs, and in full consultation with their Clinician.

Our staff can work with clients and assist them in maintaining life skills and social support systems, enabling them to live a full and satisfying life in the community.

If you or some one you know needs support in their home towards recovery, simply contact **Ascent HealthCare**.

One of our Needs Assessment staff will be available to discuss what is required. **Ascent HealthCare** will then present a comprehensive plan and budget to provide this service.

***Support for you and your Mental Health clients
is only a phone call away!***
